

Choose one feature of Java MV that you think is excellent.
Any kind of feature is fine, including a design principle, a mechanism, and an implementation method.

For the chosen feature, give a brief description and explain the reason why you think it is excellent.

In addition, show your idea that could replace the feature you chose.

Your report shall be two pages long in A4 paper.

Submit your report at the end of the lecture on Tuesday November 15.
