

Among the GC algorithms that were covered in the class, choose one that you think is excellent.

You may choose one of the three basic algorithms or one of the improvements to the basic algorithms.

For the algorithm you chose, give a brief description of it and explain why you think it is excellent.

In addition, show your idea that could further improve the algorithm you chose.

Your report shall be two pages long in A4 paper in English.

Submit your report at the end of the lecture on Tuesday December 20th.
